A user of a product from Human Care is a person who feels very confident with the product’s quality and reliability. At all times. Every step of the way. The reason behind this is our profound commitment to safety, quality and usability.

First, our products are designed and manufactured to meet the requirement of relevant ISO and EN standards. Second, every single product is given extensive attention at every stage of the design process. Third, in developing our products, our design team collaborates with globally leading physiotherapists, creating state-of-the-art products which all share the same ultimate goal: the benefit and enjoyment of their users. Allowing them to live life in the best way possible. Their way.

The convertible chair allows one single caregiver to perform safe patient transfers helping reduce the risk of injury for both patient and caregiver.
The H-250 Patient Transfer System (PTS) is a device that easily converts from a stretcher to an upright mobile chair in seconds. Its Tilt-in-Space capability allows for increased blood circulation helping to prevent skin breakdown and other complications of immobility.

With its 113 kg/250 lbs capacity, the H-250 provides a no-lift solution for moving, repositioning and transferring patients in the safest manner possible.

The H-250 Patient Transfer System (PTS) offers the ability to move between a bed and a chair with ease and enables a single caregiver to easily transfer a patient.

### Safe, comfortable and convenient.

I-Series

- Sturdy but lightweight
- Unlimited repositioning capabilities
- Easy to turn and maneuver

Our I-Series Patient Transfer System has an unlimited number of reclined and tilt positioning. The ability to frequently reposition a user significantly reduces the chance of pressure ulcers and increases the users tolerance for long-term seating.

A sturdy frame can be equipped with a patient transfer system to enable a single caregiver to perform safe lateral transfer to and from bed.

The I-Series Patient Transfer System has two different weight capacities to suit all needs; 181 kg/400 lbs and 317 kg/700 lbs.

Perfect for repositioning and transfer.

How To Order A Patient Transfer System

Qualifications

In order to qualify for a Patient Transfer System, a patient must meet the following requirements.

- Patient requires a transfer between bed and either a chair, wheelchair or commode?
- Without the use of a sling lift, patient is bed-confined?
- Patient requires supine/lateral transfers?

Common Qualifying Diagnoses

- Alzheimers/Dementia
- Amputations (AKA, BKA)
- MS
- Joint Contractures
- Decubitus Ulcers (Stage II or greater on trunk or pelvic region)
- Degenerative Joint Disease (DJD)
- Osteoarthritis
- Paralysis (Paraplegia, Quadriplegia)
- Rheumatoid Arthritis
- Seizure Disorder
- Stroke

*Please note these are just examples of the common diagnoses. There are more that will qualify.

At Your Service

Our team is here 24/7 to help collect, review, and process all necessary documentation. To get started simply fax the following to PMR: (877) 535-2034

- Most recent clinical notes such as Oasis & 485, or PT/OT evaluation, H&P, nursing notes, progress/visitation notes, etc. must be dated within the last 90 days.

Additionally, our team will obtain a signed physicians order.
